Support your carbon neutral efforts with new **sustainability** features

Rocketrip's partnership with Thrust Carbon allows your organization to measure and track its business travel CO2 emissions via a detailed dashboard.

Travel managers can optimize travel to reduce carbon emissions and purchase carbon offset projects with the savings realized by Rocketrip.

Powered by **sherpa**

We use Thrust Carbon's market-leading data on travel-related carbon emissions to accurately calculate, store, and report on customer emissions. Calculate your potential to reduce carbon emissions based upon behavior change, and the cost of that behavior change.

Sustainability dashboard

Measure current amount of emissions offset with Rocketrip

Observe emissions output by employee or by department

Maintain amount of emissions remaining to offset

Compare year over year data
